

Srinivasa Channappa

“A UX design leader and mentor passionate about empowering my team, driving collaboration, and elevating digital product experiences — one interaction at a time.”

Lead UX professional with 19+ years of experience across UX strategy, user-centered design, UX research, interaction design, information architecture, enterprise product design and frontend development. Experienced in leading end-to-end UX initiatives for complex enterprise, healthcare, insurance and business applications — from discovery and stakeholder workshops through personas, journey mapping, task flows, IA, wireframes, high-fidelity prototypes, design systems and implementation. Strong track record of partnering with business leaders, product owners, Business Analysts, engineering and QA teams to translate complex requirements into intuitive, scalable experiences. Brings a strong design-to-development perspective and applies AI-first approaches using Figma, Figma Make, GitHub and GitHub Copilot to accelerate prototyping, iteration and collaboration.

LEADERSHIP & COLLABORATION

Professional *Experience*

19+ years leading UX across enterprise, healthcare and insurance products — from hands-on design through strategy, governance and cross-functional leadership.

WinWire Technologies India Pvt. Ltd. — *Lead UX*

Bengaluru · 2019 – Present

- Lead UX across complex enterprise applications, driving discovery, requirement analysis, user-centered design, information architecture, interaction design, prototyping and design quality from concept through implementation.
- Partner with business stakeholders, Product Owners, Business Analysts, developers and QA to clarify complex requirements, facilitate design decisions, review solutions and align UX outcomes with business and technical constraints.
- Lead UX workshops and translate business processes into personas, user journeys, task flows, information architectures, wireframes and high-fidelity prototypes for enterprise and healthcare products.
- Drive design-system thinking through reusable patterns, component standards, responsive UI, accessibility, branding consistency and design governance across solutions.
- Guide design reviews and implementation feedback, helping teams maintain consistency between approved UX, frontend development and delivered product experiences.
- Apply Figma and Figma Make for rapid exploration and AI-assisted prototyping; use Codex, Claude with VS Code, and GitHub Copilot as part of an emerging design-to-code workflow.
- Support modernization of legacy enterprise workflows by balancing user needs, business rules, compliance considerations, technical feasibility and implementation constraints.
- Provide UX guidance and mentoring to team members and collaborate with distributed/client teams to improve design quality, usability and delivery outcomes.

Indegene Pvt. Ltd. — *Web Lead*

Bengaluru · Jul 2017 – 2019

- Led UX and web design solutions across the project lifecycle, providing experience direction and responsive UI solutions for desktop, tablet and mobile experiences.
 - Crafted UX strategy for sales teams aligned with business objectives and contributed to pre-sales UX approaches and commercial estimates.
 - Partnered with Business Analysts on strategy planning, approach definition and presentation of UX solutions.
 - Worked closely with onsite teams to understand requirements and provide UI/UX solutions, prototypes and responsive deliverables.
 - Provided UX guidance, supported UI/UX elicitation and collaborated with teams on frontend implementation and design consistency.
-

EVERY India Pvt. Ltd. — *Senior UX Designer / UX Lead*

Bengaluru · 2014 – 2017

- Led UX design activities for complex, multi-platform products within Agile delivery teams, translating customer and business needs into usable digital experiences.
 - Worked closely with Product Managers, Scrum Masters, Business Analysts and engineering teams on discovery, requirement understanding, wireframing, prototyping and responsive dashboard experiences.
 - Provided UX direction across projects, supported estimation and planning, and drove consistency in interaction patterns and UI quality.
-

Nichepro Technologies — *Senior UI Designer*

Bengaluru · 2013 – 2014

AdSOFT Solutions — *Web Designer*

Bengaluru · 2008 – 2013
